Circular for Classes Nursery to XII

Dear Parent
Greetings!

Good health and well- being of your ward is of paramount importance to us and we tirelessly strive to achieve the same in partnership with you. We at GDGPS, Indirapuram always endeavour to provide our students with a secure and healthy environment in the school.

Hydration is important for growing children, more so, in the summer season. It is a known medical fact that children's bodies don't adjust well to the excessive loss of fluid in summers and their bodies don't cool down as effectively. Drinking water in the right quantity not only impacts physical health but is also important to stay mentally active. It is important to ensure that children stay hydrated as adequate water intake not only supports a range of positive health outcomes, but it can also positively impact academic performance.

Keeping in mind the good health of our students, parents are requested to ensure that a child carries a transparent sippers/water bottles to the school so that the child can drink water at regular intervals. We would like to mention that the school provides safe and sufficient mineral water for the students and they can refill the sippers/water bottles from the school water coolers as and when needed. We would also like to inform you that the school has been awarded and certified as the 'Green School', hence we discourage the use of plastic disposable glasses from Tuesday, 1st May, 2018.

Let us join hands in working towards a safe Green World!

Regards

Principal

Dr. Kavita Sharma
