Classes Nursery –XII

Dear Parents
Greetings!

Please review the following advisory regarding the outbreak of Varicella (Chicken pox)

- 1.Ensure your child is vaccinated against chickenpox if they have not already received the vaccine. Vaccination can significantly reduce the risk of contracting the virus.
 - 2 .Encourage frequent hand washing and the use of hand sanitizers to minimize the spread of the virus.
 3. Advise your child to avoid close contact with infected individuals and to refrain from sharing personal items like clothing, towels, and utensils.
 - 4.If your child exhibits symptoms of chickenpox (fever, itchy rash, blisters), keep them at home and inform the school immediately.
 - 5.The quarantine period for chickenpox is typically around 10-14 days. During this time, your child should not attend school or socialize beyond school to prevent further spread.
 - 6.Ensure that your child remains isolated from siblings, friends and other family members to prevent transmission.
 - 7.Your child should be symptom-free, and all the chickenpox blisters should have crusted over.
 - 8.Before your child returns to school, a Medical Fitness Certificate from a healthcare professional is mandatory to confirm they are no longer contagious.
- We appreciate your cooperation and vigilance in following these guidelines as the health and safety of our students are our top priorities.

Looking forward to your continued support and cooperation.

Plant a  and see it grow!

Warm regards

Principal
